

Representatives,

I am a voter and listener of Satelite Radio. I enjoy the benefit that XM provides me, especially the ability to make my own choices in what I listen to and not be subject to the constant commercial advertisment on traditional AM/FM. Because I pay for the service, XM provides a service that suits me, not the advertisers. With that, I (and many others) wanted the ability to get traffic/weather info when we wanted (not according to the DJ or advertisers schedule). Because they fear having to truly compete many AM/FM radio stations are trying to get you to punish one business to benefit them. Please vote against HR 4026 and allow me to exercise choice in what I listen to and pay for in my vehicle.
